A polygon is any two-dimensional shape formed with straight lines.
In a regular polygon, all the sides and angles are equal.
In an irregular polygon, the sides and angles are not equal.

A shape net is a 2D drawing of an unfolded 3D shape. When you are drawing or reasoning about shape nets, think carefully about where the edges of the faces meet.
Side Elevation

Cube models can be drawn as 2D
representations using different elevations.

Shape net of a

| Name | Surfaces |  | Edges |  | Vertices | Picture |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Flat | Curved | Flat | Curved |  |  |
| sphere | 0 | 1 | 0 | 0 | 0 |  |
| cube | 6 | 0 | 12 | 0 | 8 |  |
| cuboid | 6 | 0 | 12 | 0 | 8 | $\square$ |
| cone | 1 | 1 | 0 | 1 | 0 | $\square$ |
| cylinder | 2 | 1 | 0 | 2 | 0 | $\square$ |
| square-based <br> pyramid | 5 | 0 | 8 | 0 | 5 | $\Delta$ |
| tetrahedron | 4 | 0 | 6 | 0 | 4 |  |
| triangular prism | 5 | 0 | 9 | 0 | 6 |  |
| pentagonal <br> prism | 7 | 0 | 15 | 0 | 10 |  |
| hexagonal prism | 8 | 0 | 18 | 0 | 12 |  |
| octagonal prism | 10 | 0 | 24 | 0 | 16 |  |
| octahedron | 8 | 0 | 12 | 0 | 6 |  |

A cone has an apex. This is because a vertex is the point where two straight edges meet and a cone has no straight edges.

## Acute Angles

Any angle that measures less than $90^{\circ}$ is called an acute angle.

## Obtuse Angles

Any angle that measures greater than $90^{\circ}$ and less than $180^{\circ}$ is called an obtuse angle.

## Reflex Angles

Any angle that measures greater than $180^{\circ}$ is called a reflex angle.

Multiples of $90^{\circ}$ can be used as descriptions of a turn.

$\frac{1}{4}$ turn $=90^{\circ}$

$\frac{1}{2}$ turn $=180^{\circ}$

$\frac{3}{4}$ turn $=270^{\circ}$

1 turn $=360^{\circ}$

## Measuring and Drawing Angles

To measure angles, we use a protractor. Look carefully at how the numbers on the scale count from $0^{\circ}$ to $180^{\circ}$ in both directions.

$$
\begin{aligned}
& 6 \mathrm{~cm}+2 \mathrm{~cm}=8 \mathrm{~cm} \\
& 7 \mathrm{~cm}+6 \mathrm{~cm}=13 \mathrm{~cm}
\end{aligned}
$$
